

## Low Profile Cable Seals Polished 316 Stainless Steel

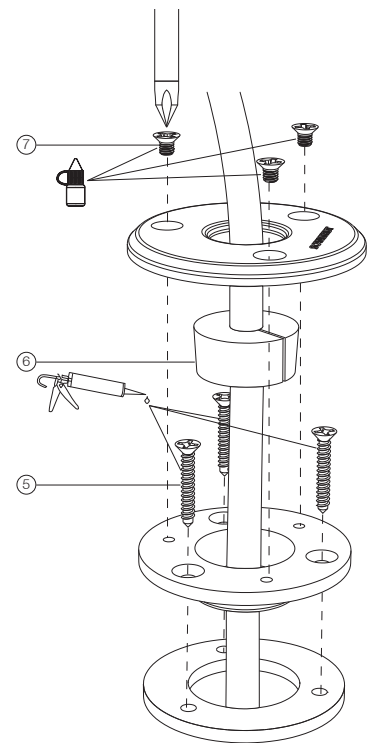

Introducing

### Our Flagship Range.

Our low-profile design reduces the overall seal height by up to 71% when compared to our standard range by concealing our seal technology below the mounting surface. This results in a cleaner, more refined appearance.

Achieve a premium finish, with our pioneering features:

- IP68 Waterproof.
- Designed for multiple cables up to 15mm (0.59"). (DS-LP-MULTI-S only)
- Supplied with pre-drilled, black and split bungs (excluding DS-LP-MULTI-S)
- Install cables without cutting off the connector (excluding DS-LP-MULTI-S)
- UV Resistant.
- Hides the cable seal technology below the installation surface
- Constructed from marine-grade 316 Stainless Steel.
- No messy sealant, ensuring a tidy finish.
- Simplified installation that saves you time and effort.
- Guaranteed 100% watertight seal.
- Perfect for Radar, light bars, rooftop electronics, and more.
- Easy pocket install with hole saw.

DS-LP-16-S
